## RUTHERFORD COUNTY CELEBRATES NATIONAL MANUFACTURING DAY

The Rutherford County Chamber of Commerce is working with the Rutherford County Schools Career & Technical Education Department, six manufacturing plants and nearly 300 high school engineering, mechatronics or industrial maintenance students and members of robotics teams across the county to celebrate National Manufacturing Day on Oct. 3.

Educational tours will give students the opportunity to gain insight about the current environment of manufacturing and allow them to see, first-hand, products that are made right here in Rutherford County.
